ABOUT ME

Detail-oriented Software Quality Assurance Engineer with over three years of experience testing web and mobile applications, covering UI, API, automation, and regression testing in agile environments. I work with tools such as Cypress, Playwright, Selenium, and Appium, and I use AI agents to streamline defect reporting and analysis. My background in Electrical and Electronics Engineering gives me a strong analytical foundation for problem-solving in complex systems.

WORK EXPERIENCE

Axel Springer National Media & Tech GmbH & Co. KG Berlin, Germany

Quality Assurance Engineer - Work Study (Hybrid)

02/2026 – Current

- Responsible for end-to-end quality assurance of the WELT News mobile applications across iOS and Android.
- Design, maintain, and execute automated mobile test suites using Testsigma (Appium-based), integrated into the CI pipeline to catch regressions before release.
- Perform functional, UI/UX, exploratory, smoke, and regression testing across real devices and OS versions, covering core flows such as push notifications, paywall and subscription purchases, and tracking/consent events.
- Built a custom AI agent workflow that auto-generates Jira defect tickets with reproduction steps, logs, severity, and a suggested root cause, reducing manual reporting effort and improving consistency across the team.
- Triage and prioritize defects, verify fixes, and monitor post-release stability via Firebase Crashlytics.
- Collaborate with developers, designers, and product managers in agile ceremonies, reviewing acceptance criteria to surface edge cases early.

Virgosol İstanbul, Türkiye

Software Quality Assurance Test Engineer (Hybrid)

02/2025 – 09/2025

Sahibinden.com Project

- Worked in a Kanban-based team, testing mobile applications across iOS and Android to ensure quality and reliability.
- Documented and visualized test results for comprehensive analysis.
- Tracked bugs and issues using Jira, facilitating efficient communication and resolution.
- Performed functional, UI, and regression testing on mobile applications to enhance user experience and stability.

Homa Games Paris, France

QA Automation Engineer (Remote)

11/2023 – 10/2024

- Worked in an Agile team, testing web and mobile products across the release cycle.
- Documented and visualized test results for comprehensive analysis.
- Tracked bugs and issues using Notion, facilitating efficient communication and resolution.
- Created and executed manual and automation test cases across UI, API, front-end, and back-end layers to ensure thorough test coverage.
- Wrote automation tests using Cypress and JavaScript, including end-to-end (e2e) tests and component tests.
- Developed component integration tests by mocking data to validate interactions between components, enhancing test coverage and reliability.
- Adhered to Behavior-driven development (BDD) principles to align automation efforts with business requirements.

- Refactored project structure by removing Cucumber files and converting scenarios into describe and it blocks, resolving structural issues and improving test maintainability.
- Integrated Mochawesome for advanced reporting after transitioning from Cucumber, ensuring comprehensive test result documentation.
- Enhanced reporting by implementing screenshots and video recordings of test executions, with uploads to AWS S3 for centralized storage and accessibility.

Etiya İstanbul, Türkiye

Software Quality Assurance Specialist (Hybrid)

11/2022 – 11/2023

- Worked in Agile teams across multiple telecom projects, conducting end-to-end manual testing in collaboration with multicultural teams.
- Utilized XRay integrated with JIRA for meticulous test tracking and report generation.
- Conducted thorough UI, API, and Database tests to ensure product integrity.
- Conducted detailed analyses of functional requirements to inform testing strategies.
- Developed and executed manual and automated test cases for front-end and back-end projects, ensuring comprehensive test coverage.
- Created test automation cases using Selenium (Python) to enhance testing efficiency.
- Contributed to the deployment process using Jenkins, ensuring smooth project delivery.

Demiryürek Eskişehir, Türkiye

Site Chief

01/2020 – 10/2022

- Supervised on-site electrical installations for infrastructure projects, ensuring quality and safety compliance.
- Managed coordination between electrical teams, subcontractors, and other disciplines.
- Digitized daily progress reports and streamlined material tracking processes.

Inemko Conakry, Guinea

Site Chief

07/2019 – 12/2019

- Directed all electrical activities on-site for an international construction project.
- Coordinated with local suppliers and international teams under challenging field conditions.
- Developed strong problem-solving and adaptability skills in a multicultural environment.

Inemko İzmir, Türkiye

Site Chief

02/2018 – 07/2019

- Led installation and commissioning of electrical systems in residential and commercial projects.
- Interpreted technical drawings and managed communication between field teams and engineers.
- Prepared progress documentation and resolved on-site technical issues.

The Turkish Armed Forces Ankara, Türkiye

Military Service

07/2017 – 01/2018

- Completed mandatory military service in Turkey

Sistem5 İzmir, Türkiye

Electrical and Electronics Engineer

08/2016 – 06/2017

- Focused on programming microprocessors for custom electronic control systems.
- Designed and tested embedded software to interface with sensors, actuators, and control boards.

EDUCATION AND TRAINING

10/2025 – CURRENT Berlin, Germany

MSc Artificial Intelligence Berlin School of Business and Innovation (BSBI)

Website <https://web.berlinsbi.com/>

10/2010 – 07/2016 İzmir, Türkiye

Electrical - Electronics Engineering Dokuz Eylül University, Engineering Faculty

Website <https://global.deu.edu.tr/>

CERTIFICATIONS

Turkish Testing Board, 12/2024

ISTQB Certified Tester Foundation Level (CTFL)

<https://app.diplomasafe.com/en-US/diploma/ddb26ff22f850884dbb3834f8f6542ee56416e7f4>

SKILLS

Manual Testing | Automation Testing | Functional Testing | Regression Testing | Unit, integration and E2E testing | API Testing | Agile (Scrum) | Kanban | Cypress | Selenium | Playwright | Testsigma | TypeScript | JavaScript | Python | GitHub | Apollo GraphQL | Jenkins | Jira | Android Studio | Xcode | Charles | SQL | Postman | Appium | TestRail | Xray | Firebase Crashlytics | Prompt Engineering | AI-assisted testing
